Technologies

JavaScript, Typescript, React, Next.js, Redux-toolkit, React Hooks, React-Router, Chakra-UI, CSS, Node.js, npm, Yarn, Webpack, OAuth2.0, Jenkins, Docker, Kubernetes, GraphQL, Jest, RTL, Enzyme, Babel, Java, Spring Boot, Rest API, OOPS, Git, Agile(Scrum), Linux and shell scripting (Basics), CMS, Asynchronous Programming, JIRA, Confluence, Splunk

SKILLS

Front End Development, Responsive Web Development, Cross Browser Development, State Management, Automated Integration testing, Continuous Integration and Continuous deployment, Automated Functional testing and Design patterns.

Experience

June 2021 – Present

Whitbread, London – *Senior Front-end engineer*

- Working as a senior front-end developer to create new web pages/add functionality to existing webpages using front end framework like NextJs, React, Redux, Angular and Vanilla JS.
- Actively interact with Business/Stockholders and decide the scope and design the UX for the features.
- Migrating the Premier Inn websites from Angular, Bart system to React and Opera system.
- Planning and designing the Micro front end frameworks and intercommunication between micro front ends using Event emitters/State sharing modules like Redux.
- Involving in maintaining code standards by peer review, introducing new tech stack in markets, 100% code coverage etc.
- Contributing towards practice development by mentoring and managing Junior Developers in the team. Organizing and attending technical sessions and sharing the knowledge across the wide digital practice.
- Oncore support to debug and fix the production issues as soon as possible, to maintain Whitbread reputation.

- Maintain Build, deployment pipeline for CI/CD for any micro front ends on ODE(On Demand Environments)

December 2016 – May 2021

Atos Syntel, London – *Consultant*

- Working as a full stack developer as a contractor for **American express and Paypal**, with an eye on developing clean, well-tested and modular code using testing frameworks like React, Redux, Jest, Enzyme etc. Enhancing website performance, with a robust understanding of DOM, JavaScript and virtual DOM.
- Grooming the Juniors/new colleagues to quickly adopt with technology and domain we use in Whitbread.
- Have extensively worked in the payment integration for PayPal, Amex client using ReactJs, Redux, Typescript, Node.js.
- Contributing towards practice development by mentoring and managing Junior Developers in the team. Organizing and attending technical sessions and sharing the knowledge across the wide digital practice.
- Managed a team and worked as a full Stack Developer, as a core member of the team to develop rich Web applications using React, Redux, Java and Node.js.
- With robust E2E test cases and unit test cases, using Jest, Mockito, helped significantly reduce testing and development time.
- Handling of middle-tier using node.js to process REST API requests and response.
- Our team's software solutions helped in reducing time to issue a commercial insurance policy, creating a hassle free and smooth experience for insurance agents .

July 2014 - November 2016

L & T Infotech – *Software Developer*

- Extensively worked in technologies like Java, PowerShell, Batch file, JavaScript, HTML, CSS3 and JQuery to build responsive and blazingly fast UI.
- Worked as a Front-End developer, to develop UI for software solutions pertaining to banking services for loan collection.
- The web application developed resulted in significant cost reductions for the client.

Interests

Science and Technology, Singing , Football, Basketball and Yoga

Education

Aug 2010 - JUNE 2014

Government college of Technology, Coimbatore – *B.E (EEE)*
